LARGE CROWD ATTEND DANCE, RALLY AT HESKETH

A monster crowd attended the dance and rally in the Community Hall at Hesketh on Friday night. The evening opened with a speech by Mr. Wood of the Soldier Settlement Board and following was the dance program. Music for the evening was furnished by a Drumheller orchestra and at midnight lunch was served. During the evening the Hesketh Women's Institute raffled a picture painted by Mrs. Chapman and the holder of the lucky ticket was Mr. Trumble of the Pool Construction gang, but as he had left and was no where to be found, a second choice was made and the holder of the lucky ticket was H.F. Irwin.

Department Opposes Introduction of Chester White Hogs

Further active steps have been taken during the past week by the Department of Agriculture to check the activities of salesmen representing the Central United States Swine Company who have been taking orders for Chester White Sows and boars in various sections of the Province.

Officials of the Department have been busy in a number of districts advising farmers to have nothing to do with the contract offered them by these salesmen. The proposition which at first sight appears attractive proves on investigation to be very unsound from the stand point of the farmer and information secured by the Department shows that farmers in a number of sections in the United States suffered heavy losses by becoming involved in similar schemes. The Bankers' Association has emphasized the warning being issued by the Department by advising local bank managers throughout the Province of the unsoundness of this scheme.

The Acme Junior Baseball team journeyed over to Carbon last Wednesday to play with the Carbon juniors. A good crowd was present to witness the game and although the score was somewhat one sided, this did not altogether indicate the play, for both teams put up a good fight. The game ended with a score of 22-5 in favor of Carbon.

—Mrs. J.C. Buckley, of Gleichen, will preside at a meeting of the U. F. W. A. in Carbon, June 12th at 3 p.m. All farm women are cordially invited to attend.

MRS. BRADEN,
Sec. U.F.W.A.

SERGEANT PURDY, A.P.P., LEAVES FOR BASSANO

Carbon citizens as a whole, regret the departure of Sergeant Purdy of the A.P.P. He leaves to assume his new post at Bassano. Constable Purdy came to Carbon two years ago and in this time has made a place for himself that will be hard to fill. One year ago he was made corporal and with his move to Bassano has been given the rank of sergeant. While in Carbon he has taken a great interest in everything that was for the betterment of the town and his work with the A.P.P. has been a credit to the force. Bassano is to be congratulated on the addition to their police force. They are fortunate in having a man of the type of Sergeant Purdy in charge of the detachment.—Calgary Albertan.

A meeting of the Tennis Club will be held in the municipal office on Friday evening, June 8, at 9 p.m. for the arranging of details for a tennis tournament. The President has offered a prize for ladies and gentlemen's doubles and all those who have paid their subscription for this season will be eligible to compete without further fee for this competition.

The services of the special Religious Campaign, which is being held in Carbon, started on Monday night of this week with Rev. H. Avison, of Central United Church, Calgary as speaker and a large crowd attended to hear the remarks of this great orator. On Tuesday evening Rev. W. E. MacNiven, of Wesley United, Calgary, spoke to the people, but the crowd was not large owing to the inclement of the weather.

Rain, R-a-i-n, R-a-i-n, and more of it; but that is what we want this time of the year.

CARBON BOARD OF TRADE LUNCHEON ON WEDNESDAY

A luncheon of the Carbon Board of Trade will be held in the dining room of the Carbon Hotel, Wednesday, June 13, at 1 p.m. Rev. Geo. A. Dickson, minister of Knox United Church, Calgary, will deliver his popular address "Canada and Canadians from the view point of a Scotchman." A cordial invitation is extended to all business men in the town and farmers in the surrounding district to attend this luncheon. A charge as 50c per plate will be made and all wishing to attend please advise S. F. Torrance so that seating arrangements can be made accordingly.

FIVE REASONS

WHY WHEAT PRODUCERS SHOULD SUPPORT THE WHEAT POOL

1. Because your self-protection as a producer is incomplete and ineffective in private organization can still exploit you by manipulating prices against you.
2. Because co-operation helps to uphold the standard of living by suppressing the element of profiteering in the grain produced by your labor.
3. Because co-operation eliminates unnecessary middle men and dividend hunting shareholders, who take a heavy toll of the wealth produced by the farm workers
4. Because the co-operative principal of "each for all, all for each" is the workers' ideal which alone can bring economic and social justice, peace and prosperity, to all throughout the world.
5. Because the farm workers ought to concentrate their resources in co-operation instead of supporting capitalistic organizations hostile to co-operative movements.

Talk Peace To Have Peace

It is now fairly well recognized by students of international relations that one of the causes of war is to be found in the constant predictions of war, in references to "the next war," and surmises as to the varying forms which hostilities will take when nations again take up arms against each other. Those who constantly predict war are, says a college president, "not simply reporters of probable events, they are actual causes of war, generally among the chief causes." That is, talk war and you have war.

Recognizing the correctness of this view, it is equally true that if the statesmen and leading men in all countries cultivate the habit of talking peace instead of war, the world will have peace. "The oftener world peace is discussed among serious minded men and women," says a United States paper, "the better the prospect that war can be at last conquered," and it adds that the more intelligent leaders of democracy the world over can be brought together to consider steps for peace. As they gather from time to time at Geneva, the brighter becomes the prospect that ultimately—perhaps sooner than most of us now believe—war will be abolished.

War after all is largely a state of mind. Let the people of any community or country begin to take a pessimistic view of things and constantly harp upon business depression and hard times, and it is inevitable that depression and hard times will come. Equally true is it that when people talk properly and adopt an optimistic tone, a revival in business and industrial activity follows. If, instead of thinking of "the next war" and talking war, people think and talk peace, then peace rather than war will prevail.

It has been reported that the Supreme Court of the United States has settled one hundred disputes between States, and in Canada our Supreme Court and the Judicial Committee of the Privy Council, have settled numerous disputes between Provinces and between Provinces and Dominion.

Why disputes between nations be settled in a like sensible way? There is such justification for two States or two Provinces to declare war on each other's throats as there is for two nations to take such insane

tupid business. It settles no issues. It comes about when men get into a quarrel with another little group. The law individuals to murder each other because they have a quarrel. In like manner, outlaw war as a means of settling disputes between nations. War between nations is evidence that the countries have not sufficient intelligence or sufficient self-control, so they select the finest men on both sides and set them pounding each other into the mud and blood and blowing each other to bits. The side that can stand this the longer is the wiser and gets its own way. There is no reason employed in the settlement.

Sir Esme Howard, British Ambassador at Washington, in a recent address said: "If it can be proved to a man that if his country goes to war for any issue short of its absolute liberty of action at home, and in defence of that liberty, he will in future stand a very good chance of being bombed in his home; if we can show him that even though his country may be victorious, he will certainly have his taxes increased by 200, 300, 400 or 500 per cent.; if we can make it clear to him that for the sake of some issue to which he is probably an entire stranger he risks having to give up that new Ford next month, or, even worse, that he may very probably be thrown out of work, as has been the fate of millions in Europe after the last war; then perhaps he may find war less pleasingly dramatic and may bestir himself to see that as a means of settling disputes between nations, it is better abandoned. So far as statecraft is concerned, the fear of war is the beginning of wisdom."

Some people may be inclined to doubt the value of Peace Talks, Disarmament Conferences, and treaties between nations outlawing war, but the fact is these are all factors in educating people and helping to create and develop a peace consciousness in all countries. And, let it be repeated and emphasized, the creation of such a consciousness is the strongest of all guarantees for the maintenance of peace.

Medical Aid Caravan

A medical aid caravan will circulate through Northern Alberta this year. It has been sent out by the provincial department of health and is in charge of Dr. R. T. Washburn, superintendent of the University of Alberta hospital.

The beam cast by the latest monster beacon is estimated at 500,000, 600 candlepower.

Increase In Acreage

Increase in acreage of every grain in the Lethbridge Railway division with an increase of over half in rye is shown by the first crop report of the Canadian Pacific Railway.

A British scientist predicts that, in time to come, men will be born toothless. We thought, in our ignorant way, that they usually were born that way.

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this harmless,

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Parachute Lands Plane Safely

Invention Of California Man Proves Feasible In Test

A small biplane has been landed safely from 2,000 feet by means of a huge parachute, without injury to its pilot or damage to the plane. The experiment, performed privately at Tracy, Cal., was designed to prove the possibility of using a parachute for disabled planes to insure safety of passengers. A Jenny biplane, piloted by E. J. McKeown, was used in the test.

The plane dropped about 2,000 feet with its motor idle, when the huge parachute, more than 100 feet in diameter, opened out. McKeown stayed with the ship as its speed rapidly slackened. He said he felt only a slight jar when the plane landed and the folds of the parachute enveloped him. The biplane was not damaged except for a minor bend in the tail skid.

The parachute is the invention of Charles Roderick, San Francisco, who with numerous other airmen, expressed complete satisfaction over the result of the experiment.

Tractors On the Farm

Western Farmers Investing More Heavily In Motors For Heavy Duty

There are in Alberta today 77,192 farmers who have 834,324 horses in use, and 10,225 tractors. In Saskatchewan records show 116,762 farmers with 1,199,566 horses, and 24,367 tractors. Manitoba has 51,200 farmers with 556,480 horses, and 10,833 tractors. The survey would indicate that while the horse is yet far from being a back number on Western Canadian farms, the day of the tractor has definitely arrived.

FIGHTING FOR BABY'S HEALTH

Is the Constant Care Of Every Young Mother

The young mother has a constant care in looking after the welfare of her little ones. Childhood ailments come on so sudden—sometimes without a minute's warning—the mother may have a very sick baby on her hands before help can be obtained. That is unless she has a remedy in the house which she can safely give the baby for any of the many minor ailments of babyhood and childhood.

Such a remedy is found in Baby's Own Tablets. Thousands of mothers throughout the country always keep a box of the Tablets on hand and they proclaim them to be without an equal for sweetening baby's stomach; regulating his bowels, and thus driving out constipation and indigestion, colds and simple fevers, and making the dreaded teething period easy.

Baby's Own Tablets are an absolutely safe remedy. They are guaranteed to be free from opiates or any other narcotic drug which are so harmful to the future welfare of the baby. Mothers, if you value the life of your little ones give him Baby's Own Tablets when he is ill, or, better still, give him an occasional dose of the Tablets to ward off illness. The Tablets are sold by medicine dealers or will be sent to any address, post paid, at 25 cents a box; by addressing The Dr. Williams' Medicine Co., Brockville, Ont.

Tribute To British Flag

Union Jack Made Union Flag Possible Says South African Councillor

A great tribute has just been paid to the Union Jack, and satisfactorily enough from that country in which there has been some commotion about it—South Africa. A press despatch from there says that native affection for this flag was eloquently demonstrated at a General Council of the Transkeian Territories which might be described as a native Parliament, when the Council unanimously passed a resolution that the Government be requested to permit the Union Jack to be flown with the Union of South Africa flag on all Magistrates' offices in the native territories. A Councillor asked the members not to discard their old friend the Union Jack, which had freed them from slavery and which was the only flag they knew. He did not object to the Union Flag, but pointed out that were it not for the Union Jack there would be no Union flag. We might also venture to say that were it not for the Union Jack there would be no Canada as there is today.

A reliable antiseptic—Minard's.

Progress Has Been Made

Sending Messages By Beam System Is Marvel Of Speed

What beam wireless has done for long-distance communication was explained by J. H. Thompson, chief engineer of the Marconi Wireless Company, to the members of the Montreal branch of the Engineering Institute of Canada, recently. Using slides, the speaker produced a graphic picture showing a telegraph operator at Drummondville, Quebec, using an instrument resembling an ordinary typewriter and sending messages at the rate of 150 words to the minute, to be received almost instantly by an operator at Dorchester, England.

Mr. Thompson illustrated the progress made in wireless transmission by showing the crude instruments used in the early days of wireless, the progress having been so rapid that equipment of stations used 15 years ago is of no use today. The beam system itself, he said, was the result of experiments by which all the energy available at the sending station was successfully sent in one direction thus establishing a beam of energy.

Some men are sentenced to hard labor for life and some do it of their own accord in order to make ends meet.

Seed Growing In B.C.

Industry On Vancouver Island Rapidly Increasing In Importance

Seed growing is one of the latest industries of Vancouver Island of steadily increasing importance. Vancouver Island sweet pea seed sells on the English market from three to four shillings per pound more than the California seed. The largest sweet pea seed farm is at Duncan, which produces yearly about two tons. From 15 to 20 women are employed each year to pick, clean and pack the seed whose excellence and high quality is becoming world-famous.

Spare the children from suffering from worms by using Miller's Worm Powders, a most effective vermifuge with which to combat these insidious foes of the young and helpless. It is an excellent worm destroyer, and when its qualities become known in a household no other will be used. The medicine acts by itself, requiring no purgative to assist it, and so thoroughly that nothing more is desired.

A man could learn a great many things if he didn't think that he already knew them.

For Hay Fever—use Minard's.

The average man prides himself on the possession his neighbors can't afford.

HERCULES PERMANENT BUILDING PAPER

ED. J. ROULEAU,
Editor and Publisher

SWALWELL

The case of L. J. Hanses vs. H.
B. Miller was recently tried in Su-
preme Court before Mr. Justice Ives.

This was an action brought by
Mr. Hanses of Swalwell, Alberta
against Mr. Miller for title to a
certain farm near Swalwell pur-
chased by Mr. Hanses from Mr.
Miller.

Mr. Hanses claimed to have paid
in full for the property and Mr.
Miller, the Defendant, claimed that
he had not received payment. The
action hinged around the fact that
Hanses claimed to have deposited
\$1000.00 in the Union Bank Swal-
well, in the fall of 1920 to the cre-
dit of Mr. Miller's account upon
Mr. Miller's instructions, which
Mr. Miller claimed to have never
received.

Mr. Justice Ives held that the
payment had been made according
to Mr. Miller's instructions that
the farm had been paid for in full,
and that Hanses was therefore en-
titled to the title of the farm.

Judgment was accordingly given
in favor of the plaintiff with costs.

Mr. M. B. Peacock and Mr. G.
M. Peacock acted for Mr. Hanses
and Mr. A. H. Goodal was for the
Defendant.

Miss Minnie Gore, only daughter
of Mr. and Mrs. O.S. Gore of Swal-
well, whose marriage to Mr. S.
Howe was to take place on June 5,
was entertained at a Miscellaneous
shower last Wednesday afternoon
at the home of Mrs. Clarke, and
given by her many friends in the
district.

The many lovely and useful gifts
were contained in an imitation,
massive, two-tier wedding cake,
surmounted by a doll in bridal at-
tire and otherwise very tastefully
decorated.

With everything previously ar-
ranged and all the guests assem-
bled, the guest of honor was the last
to arrive and her surprise was com-
plete. On her arrival Mrs. A. V.
Prime, in a very pretty and well
chosen speech, presented the bride-
elect with the contents of the
"bride's cake."

After the good wishes of the as-
sembled guests refreshments were
partaken of. The hostesses were
Mrs. I. U. MacLennan and Mrs.
M. Clarke. The following were
present: Mrs. W. R. Gore, Mrs.
Prime, Mrs. J. Wulff, Mrs. W. Orr,
Mrs. W.E. Howe, Mrs. W.J. Howe,
Mrs. H. Longstaff, Mrs. B. Trick-
er, Mrs. Jean Fraser, Mrs. S. R.
Tilley, Mrs. B. Hongel, Mrs. T.
Leary, Mrs. H. Elliott, Mrs. Page,
Mrs. A. B. Claypool, Mrs. A. H.
Wills, Mrs. G. Chatten, Mrs. O.S.
Gore, Miss Verda Gore and Miss
May Howe.

Fight the Fire Fiend

The week commencing October 9 has, by proclamation published in the Official Gazette at Ottawa, been declared Fire Prevention Week throughout Canada. The object is, of course, to focus public attention upon the enormous losses, both of life and property, resulting from fire with a view to the adoption of more effective safeguards against fire, and to educate all people, and especially children, against habits of carelessness in the handling of matches, gasoline and other combustibles, and in the disregard of common-sense methods in the matter of extinguishing camp fires, and such simple matters as throwing away the still lighted stubs of cigars and cigarettes.

At first glance it would seem to be quite unnecessary for the national government to officially set aside one week out of every fifty-two for the avowed purpose of teaching a presumably intelligent, educated and business-like people to safeguard their own lives, homes and property from destruction. Unfortunately, Canada's fire record proves conclusively that it is only too necessary to keep up a persistent campaign to awaken the people from their carelessness and indifference in this very vital matter.

Canada, which is so progressive in many ways, and has taken the leadership in numerous worthwhile movements, and can claim the honor of achievements, occupies a low place among the nations of the world when statistics of fire losses are studied. Few countries, if, indeed, any one, annually record the appalling fire losses which take place in Canada. This Dominion's fire loss per head of population is about the highest in the world, and the passing years do not reveal much improvement.

Canada has already sustained the loss not merely of millions but actually billions of dollars worth of forest wealth, some of which is gone forever, and where long periods of time will be required to make good the loss in other districts. And these forests are one of Canada's greatest assets, — one of the principal factors today, and for the future, in building up the Dominion's greatest industrial enterprises and providing a very large percentage of the Dominion's export trade.

The fire fiend takes a yearly, monthly, almost daily toll of human life, as well as leaving behind it a trail of lifelong suffering and economic loss in blinded and crippled humanity.

Because of the high ratio of fire losses, the people of Canada have to pay abnormally high rates for fire insurance. The insurance companies are not to blame for demanding high premiums. They must protect themselves and their policy holders, and just so long as fires in Canada remain so numerous and costly, so long will the cost of insurance against fire remain a heavy drain upon the business of the Dominion.

Then, too, there is the further heavy burden imposed upon all urban communities in the maintenance of elaborate and expensive fire-fighting equipment, and large expenditures to augment water supplies for fire-fighting purposes greatly in excess of the daily domestic requirements of cities and towns.

All these forms of protection are necessary, and must be paid for in our tax bills. But because of the frequency of fires largely the result of carelessness and neglect of the most ordinary precautions on the part of many people, these services have to be maintained on a much more extensive and expensive scale than would otherwise be necessary.

Fire Prevention Week should, therefore, be observed all over the country. Special attention should be paid to the subject in all schools, while each individual householder should devote a little time to a thorough examination of his premises and make a close check-up of conditions in and around all buildings. Rubbish should be cleared away, unprotected stove pipes, electric wires, gasoline and oil supplies attended to, and every member of the family cautioned to exercise the greatest care in handling of matches and all combustible materials, lighted lamps, and in the making and extinguishing of fires. Finally, all property should be adequately insured notwithstanding all precautions that may be taken.

Attention to these important matters now may save much loss and suffering in the future.

Giant Dirigible Damaged

Expansion Of Gas Through Weather
Conditions Caused Peculiar
Accident

A peculiar accident to the giant dirigible Los Angeles occurred while the huge airship was moored at her

moor in Lakehurst, N.J. The temperature rose suddenly, causing the helium gas in her containers to expand rapidly, and the wind shifted 180 degrees in a few seconds. The result was that the ship threw her stern high into the air, almost at an angle of ninety degrees, and whirled around with the sudden change in the wind. The temperature went back to normal rapidly, so that the gas assumed its normal volume and the tail of the ship dropped down. Meanwhile, however, loose gear in the ship was thrown about, causing some damage.

Japan Needs Post Offices

Government is Considering Plans For
Increase in Number

More post offices are needed in Japan. For each 6,700 persons in the country there is only one post office. England and Germany have one to 2,000 persons. The Communications Department is considering plans for the increase in the number of offices and an appropriation is to be included in next year's Budget for the opening of 8,000 more post offices over a period extending ten years. At the end of ten years each village throughout Japan will have a post office all to itself.

Canada Favored For League Seat

London Paper Says Dominion Well
Qualified For Seat On Council

The London Observer, commenting on Canada's candidacy for a seat on the League Council, says it would be hard to pick another candidate more powerfully qualified for the privilege. The great war was warrant enough of Canada's capacity for international service and she has played other parts since then.

In numbers and influence taken together, continues the Observer, Canada ranks high in the list of candidates, and above all, it would be invaluable for the league to have for the first time a direct representative from North America upon the council.

Toes Kept Free From Sore Corns

When you notice any sign of callous on the feet or toes—that's the time to paint on a few drops of Putnam's Corn Extractor. Do this, and you prevent corns. No matter if the corn is hard or soft. Let it be on top or between the toes. Putnam's will remove it without pain. Insist on "Putnam's" Corn Extractor. It does the work—and roots out the corn.

Self-Sustaining Air Services

Probably the only two self-sustaining air transport routes operated during 1926 in the Empire were in Canada—those from Halleybury to the Rouyn, and from Sioux Lookout to the Red Lake mining fields. These are on an absolutely commercial basis and have had no Government subsidies.

A PERFECT MEDICINE FOR LITTLE ONES

Baby's Own Tablets Should Be
In Every Home Where There
Are Children

The perfect medicine for little ones is found in Baby's Own Tablets. They are a gentle but thorough laxative which regulate the bowels, sweeten the stomach, drive out constipation and indigestion; break up colds and simple fevers and promote healthful refreshing sleep. It is impossible for Baby's Own Tablets to harm even the new-born babe as they are absolutely guaranteed free from opiates or any other injurious drug.

Concerning the Tablets, Mrs. Alex. J. Perry, Atlantic, N.S., writes:—"I always keep Baby's Own Tablets in the house for the children, as I have found them a perfect medicine for little ones."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Coal Not Merely a Fuel

German Scientists Discover Many
Valuable By-Products

European scientists appreciate that "coal is not merely a fuel but contains raw products to make things out of," declared Dr. Thomas S. Baker, president of Carnegie Institute of Technology, upon his return from a trip abroad.

Coal's potentialities are particularly appreciated in Germany, according to Dr. Baker, where "there has been a most striking development in synthetic fertilizers in connection with coal—the outgrowth of the fixed nitrogen process developed during the war. It is a matter of very great economic force to the country and farm productivity has been materially increased."

"A great deal of the enormous success that the German Chemical Trust is having centres around the chemistry of coal," Dr. Baker said.

"While Germany has lost its monopoly of dyes, it is developing other processes that are of great importance to modern industry. This trust is said to be producing synthetic gasoline on a commercial basis."

It Will Prevent Ulcerated Throat.—At the first symptoms of sore throat, which presages ulceration and inflammation, take a spoonful of Dr. Thomas' Electric Oil. Add a little sugar to it to make it palatable. It will allay the irritation and prevent the ulceration and swelling that are so painful. Those who were periodically subject to quinsy have thus made themselves immune to attack.

The oldest university in the world is that at Pavia in Italy, founded in 825 A.D. by Lothair, grandson of Charlemagne.

Drives away pain — Minard's Lini-ment.

Cuticura Soap Shampoos Keep the Scalp Healthy

Regular shampoos with a suds of Cuticura Soap and hot water, preceded by light application of Cuticura Ointment, are most effective. They do much to cleanse the scalp of dandruff, allay irritation, stimulate circulation and promote the healthy condition necessary to a luxuriant growth of hair.

Sample Each Free by Mail. Address Canadian Depot: "Stashove, Ltd., Montreal." Price, Soap 25c, Ointment 25c and 50c, Talcum 25c. Cuticura Shaving Stick 25c.

French Use Bicycles

Report Shows They Out-Number
Automobiles Ten-To-One

The number of bicycles in use in France in 1925 amounted to 7,112,900, an increase of 5 per cent. over 1925, according to Trade Commissioner Louie Hall, Paris, in a report to the Detroit office of the Department of Commerce.

About half a million bicycles are now used in Greater Paris, the Department of the Seine having 476,665 registered, or two to every eight inhabitants. In the highly industrial departments of Northern France, a total of 856,000 bicycles are in use, or one to every five inhabitants. There are 10 times as many bicycles in France as automobiles.

Asthma—Is Torture. No one who hasn't gasped for breath in the power of asthma knows what such suffering is. Thousands do know, however, from experience how immeasurable is the relief provided by that marvelous preparation, Dr. J. D. Kellogg's Asthma Remedy. For years it has been relieving the most severe cases. If you are a sufferer do not delay a day in securing this remedy from your druggist.

Will Plead Law Cases In European Courts

American Woman Attorney Going To
Paris, Athens and London

An American woman attorney will try cases in Paris, Athens and London while on a "vacation." She is Miss Grace H. Brown of Detroit, who plans to sail to Europe soon to carry out her legal plans. In Paris Miss Brown will represent an Armenian claiming \$500,000 from the Turkish Government for land he alleges was confiscated. She has been retained in an immigration case in Athens and an involved estate will claim her attention in the London courts. Miss Brown has received introductory letters to the foreign courts from Secretary of State Frank B. Kellogg.

Some men waste a lot of valuable time explaining their actions.

Radio is Better with Battery Power

Ever since the inception of radio, batteries have been the accepted source of power. Pure DC current without hum or surge and correct voltage for all tubes and varying conditions are most conveniently and economically obtained today as in former years with batteries.

A, B & C BATTERIES

made by Eveready are the choice of radio users everywhere. There is an Eveready radio battery for every radio need. Your dealer recommends and sells Eveready Radio Batteries. Consult him about the correct batteries for your particular set.

CHAPTER VIII.—Continued

The Wymuths were exactly the same type, — black-eyed, pale, anaemic, with lustreless thin, black hair, through which a bloodless scalp showed blotchily; false teeth—no, not false—everyone could see what they were — artificial, rather — so white they were almost blue. They believed in hell and spoke of the "world" in a tone which implied both horror and contempt. They knew that Christ was coming soon to take His own out of the world, leaving the other odd millions to their well-merited punishment.

Mr. Wymuth satisfied the Board that he believed in discipline for wayward girls—discipline, repentance, and after that a life of meek and lowly spirit.—"And," said Mr. Wymuth, "my wife will be guided by me entirely," at which Mrs. Wymuth bowed her head and drew her thin lips more tightly over her blue teeth.

The Board breathed more freely. "It will be better now," said Dr. Smythe, "and I think it would be well to have the pastors appeal to the ladies to have a series of teas to raise money for the additional salary. I am sure the ladies will take care of it."

It was to the Girls' Friendly Home (under the Wymuth rule) that Helmi finally was committed. If she had been of the full age of eighteen years she would have been sent to jail.

The police matron, a silent woman, who held her job because she was no talker, came with her on the car. Helmi, with her clothes in a little green valise which Miss Abbie had given her, walked confidently down the path which led to the big oak door. The former matron's flowers bloomed at each side of her. They nodded a welcome to her, and she felt reassured and comforted. It must be a nice home where there were so many flowers. Helmi had put on her pleated skirt and white middie, which now had the monogram on it, just like the other girls. She wore it today, be-

cause it had always brought her a good time and was full of the vibrations of fun and fellowship. The Blue and Gold Book was in her valise, and her English learning book, too. She would be all right, and Miss Rodgers would come, and the girls, too.

Helmi had not yet given up hope that Mrs. St. John would come to her aid when she was better. She still thought of her as she had last seen her, heavy-eyed, distressed, ill, and told herself over and over again that this was why her dear friend had not come to her. She was still too sick to know what had happened. Helmi liked to picture the scene. Her friend in her slinky gown of black silk, with her pearls, would come; she would be wearing her green velvet cloak, the one that looked just like the ocean foam that had gone cutting away from the boat in creamy suds when she crossed the ocean, and her black hat with the silver arrow; she would come driving up in her big car and talk to the people in big swanky English words, making her eyes go snap like she could when she wanted the Doctor to do something. Everyone always did what Mrs. St. John wanted, and she would be so mad that people had been mean to Helmi, and she would call them names, and stamp her foot, and maybe swear a little — just a few good ones. And then she would turn and say "Come, Helmi, my poor, brave child."

Oh! it would be sweet. As Helmi was the first case to be brought in since Mr. and Mrs. Wymuth came, the worthy couple were determined to show the Board the value of discipline. The history of the case had been given them. The girl had refused to tell why she was in the Chinese den.—It was evidently a stubborn case. Mr. and Mrs. Wymuth had dealt with stubborn cases before. The proud and froward spirit must be broken. And it could be. They were waiting eagerly for Helmi. The Board would expect results, and the Board would not be disappointed.

When the Police Matron and Helmi climbed the flight of stairs leading to the great front door and the bell was rung the lock was turned in the door and they were admitted into a dark hall. As they entered the door was shut again so promptly behind them that the corner of the Matron's cape was caught and had to be released. Then the big bolt shot into place, and in a whisper Mrs. Wymuth asked them to come this way, leading them down the hall to a gloomy room which she called her "Retreat." The door was shut and locked, and Helmi was told to sit down.

The Matron, living up to her reputation of being no talker, handed Helmi over with as much emotion as is shown by the ice man when he loosens his pincers from the square of ice and leaves it to drip its life out on your back step. His responsibility ceases when the step is reached.

"Good-bye, Helmi, be a good girl," she said, not without a degree of kindness. Her last delivery, to the Girls' Friendly Home had pulled a handful of hair out of her not too well covered head! so she felt kindly to Helmi.

Helmi wrote her name in the brown book Mrs. Wymuth showed her, quite proud of the fine big letters she was able to make. She wrote her address "c/o Miss Abbie Moore, 52 Chestnut St."

Mrs. Wymuth admired her writing. "And you can English speak?" she asked sweetly, feeling that if she transposed the words they would be

more intelligible to the Finnish girl. "A little," said Helmi, smiling back. "You will learn more here," said Mrs. Wymuth: "all our good girls go to school. You like school?" Helmi nodded.

"Now, dear I want to be your friend — I am a little mother to all the girls — I want you to tell me all about yourself."

Helmi told her about coming to Saint Paul—her aunt's death—her coming to Winnipeg—Miss Abbie Moore—the Girls' Club. Suddenly she stopped.

"Ye-e-e-s?" Mrs. Wymuth stretched the word out until it seemed like a sharpened pry which would be sure to lift another slab of conversation. "That is all," said Helmi.

"Who sent you for the medicine, dear?" asked Mrs. Wymuth casually. "I cannot tell," replied Helmi, looking her questioner straight in the eye.

"You mean you will not tell. Now, Helmi, trust me—I'm your little mother." She came over to the girl and laid her hand on her shoulder. Her touch made Helmi shiver, and when she bent nearer Helmi drew away from her.

"I will not tell," said Helmi again.

Mrs. Wymuth drew her lips tightly over her two plates. "We'll see," she said, and Helmi knew it was a threat.

That night Helmi met the girls at supper. The table had been turned diagonally across the room to get greater length, and it had a clean cloth, although it was not Sunday; Mrs. Wymuth had expected a visit from some members of the Board.

"Now, girls," said Mrs. Wymuth, in her sweet way, after a lengthy blessing had been called down from on high, "we have a new girl, Helmi Milander. She has come to us for a while, and I want you to be very good to her, and very kind. Let her know she is among friends here. Helmi and I have had a little difference already, which I wish to tell you about. In order to help her I must know her whole story, and this she refuses to tell me. I have coaxed her, but she remains stubborn. Isn't she foolish, girls? I am here to help every girl, but the girls must let me. Isn't she foolish, girls?" she repeated.

"Yes, Mrs. Wymuth," said the girls in chorus. But they said it listlessly. Their days of mourning for the other matron were not ended.

Then Mrs. Wymuth proceeded to tell the story, the girls listening open-mouthed. A new girl's story was always interesting.

"Now we will all pray that Helmi's stubborn spirit may be melted. You will all pray, won't you girls?"

Helmi sat looking from one to the other helplessly. Had she not one friend anywhere?

Every night after the evening meal there followed this orgy of prayers, when every girl who wanted to stand well with the matron prayed. Much of it was meaningless, but as the prayers went on a certain excitement laid hold on them, and in their supplications they forgot that other ears than God's were listening, and unconsciously they revealed many things. The Matron was hopeful that Helmi would be swept into the whirlpool of excitement, and would tell what she wanted to know. Helmi sat still and listened, but refused to pray.

Dinner Sent By Air

Reno Rancher Ordered Sixty Plate Meal From San Francisco

The St. Francis Hotel at San Francisco received an order for a sixty-plate dinner to be delivered by aeroplane at the home of W. H. Moffit, cattle rancher near Reno, Nev.

Arrangements were made by telephone from the Moffit ranch to forward the meal in an express aeroplane, with electric heaters to keep the food hot, a head waiter to superintend the serving, and two aviators properly attired to serve.

New Home Ready

Prince Of Wales To Take Up Residence In Marlborough House

The Prince of Wales will go into residence at Marlborough House soon after his return from Canada.

Marlborough House, an almost square, solid red brick building, was built by Sir Christopher Wren just over 200 years ago for the first Duke of Marlborough. Later it became the residence successively of various members of the royal family, and finally was acquired for King Edward VII. then Prince of Wales.

The present Prince of Wales will actually use only a small portion of the house himself. His suite will be on the first floor, which looks out on two acres of garden. A large room, which was formerly an audience chamber, will be converted into a combined reading room and study where the Prince will conduct the principal part of his correspondence.

On the ground floor is a large room which will be used for the entertainment of friends who are not of the Prince's intimate circle.

Queen Alexandra's boudoir and bedroom will remain exactly as they were in her lifetime, as will also the four state rooms with their pictures and statuary. The same course was followed with regard to Queen Victoria. Rooms at Osborne House, Isle of Wight, where she died—although her death took place more than a quarter of a century ago and although Osborne House as a whole has been put to different uses—remain as they were in her lifetime.

Hard and soft corns both yield to Holloway's Corn Remover, which is entirely safe to use, and certain and satisfactory in its action.

Was Interested In Photography

Queen Alexandra's interesting collection of photographs taken by herself has just been found. Her late Majesty had a great gift of seizing a good picture, and would have made a name in this line were she born in a less exalted position. In the collection are pictures of every royalty in Europe, for more than half a century. Up to a few years before her death she kept up her interest in the camera.

Though unresponsive, as a rule, to natural beauty, Napoleon showed a marked preference for violets.

Little Helps For This Week

Let the word of Christ dwell in you richly in all wisdom.—Col. iii. 16.

"Tis not the skill of human art Which gives me power my God to know; The sacred lessons of the heart Come not from instruments below; Love is my teacher."
—Madame Guyon.

Every great teacher or leader lays stress on some single word of might, —the key, as it were, to his position. Buddha's great word was "renunciation." Zoroaster's, "purity." Menu's was "justice." The key to Confucius is "moderation." Moses emphasized "law." Plato, "harmony." Socrates, "reason." The strong word of Epictetus was "reliance." Antoninus, "self-possession." But Jesus gives us the key to the inner chamber of His heart in a single, mighty, sweet word, —"love."—O. B. Frothingham.

Merely a Signature

A member of a congregation, becoming angry at a sermon the minister was preaching, wrote the single word, "Fool" on a sheet of paper, called an usher to him, and had it delivered to the minister in the middle of his sermon. The minister opened the paper and read what was written. Then he said: "An unusual thing has happened. A member of the congregation has signed his name without writing the letter."

Girls admire promising young men, but everybody else prefers those who pay cash.

Used by physicians—Minard's Lintment.

COLDS COST MONEY

FORTIFY YOURSELF AGAINST THEM

It is estimated that a sufferer from colds loses three days' time from work in a year.

At work, in the "movie," or at any entertainment, if your neighbor has a cold and sneezes or coughs, the air is full of germs and if you are not in good condition, you may become ill. The only protection you can have is to build resistance against disease forces. Take that splendid herbal tonic,

DR. PIERCE'S GOLDEN MEDICAL DISCOVERY

It increases the appetite, stimulates the digestion, helps to enrich the blood and to improve the health generally.

Procure it from your druggist, in either liquid or tablet form. Write Dr. Pierce's Invalids' Hotel in Buffalo, N. Y., if you desire free medical advice.

EXPECTANT MOTHERS

Read Mrs. Menard's Letter. Her Experience May Help

Chatham, Ontario.—"I want to tell you how much good your medicine has done me. Before my baby came I felt so weak and run-down that I could hardly do my work. My head ached continually and I was so discouraged that I could cry from morning till night. I had another baby just one year and a half old and it gave me a lot to do. So I thought I would try Lydia E. Pinkham's Vegetable Compound, as I had read so much about it in the little books. I found a difference right away as my head was relieved and my tired feelings gone. My sister had been doing my washing and she continued doing it, as she said it might set me back if I started to do it again. It sure did help me and I had taken just two bottles when my baby came. He is a fine big boy, now nearly five months old. I am taking your medicine again and I am able to do my work all by myself now. I always recommend the Vegetable Compound to women, and especially to expectant mothers, as I believe they need help at those times."

Mrs. OLIVER MENARD, 24 Hatvey St., Chatham, Ontario.

Overtake the "72"?

... well, hardly!

ALL cars today seek to approximate Chrysler "72" performance by patterning after Chrysler engineering. But after three years of striving, how close are they to the "72" today? No closer than they were four years ago.

As they have struggled to approach, Chrysler "72" has pulled away and gallops around and past them with more than the ease of the old original Chrysler sensation-car of 1924.

There may be pocket-book reasons for choosing cars of lesser price than the "72." There simply cannot be a valid reason for paying as much or more for any car other than the "72."

The Canadian Pacific's Big Five

1—Map showing the five cities where the trains will leave and arrive.
2—Banff, the converging point of the quintette trains operated by the Canadian Pacific Railway.
3—One of the giant engines to be used for these long runs.

When the Big Five, the quintette of trains de luxe to be operated by the Canadian Pacific Railway on express schedules from the east of Canada and from Chicago this coming summer to the coast, make their initial runs, the dramatic spectacle will be presented daily of five great trains flying across the Dominion and all converging on the wonder district of the American continent, the Canadian Rockies, where snow-capped mountain peaks and beautiful valleys and lakes vie with another in attracting visitors from all parts of the United States and the rest of the world.

The key train of the quintette will be the "Trans-Canada" which with two others "The Imperial" and "The Toronto-Vancouver" ex-

press will have their runs entirely in Canadian territory. The balance of the five, "The Mountaineer" and "The Soo-Pacific" will leave from Chicago for the Canadian Rockies and the Pacific coast and will consequently run partly through the United States. The "Trans-Canada" and the "Mountaineer" are all sleeping car trains.

The "Trans-Canada" with a reputation throughout the world covers the 2885 miles between Montreal and Vancouver in 89 hours and 15 minutes. As part of its equipment it carries an open observation car between Calgary and Kamloops. This train starts on May 13. The "Imperial" and the "Toronto-Vancouver" express operating from the coast to Montreal and Toronto

respectively are both year round trains except for modified schedule. Finally, there will be "The Mountaineer" and "The Soo-Pacific" running out of Chicago for Vancouver, B.C. The former will start its daily run to Vancouver on June 11 and the train will commence operation from the coast to Chicago on June 15. In this run ten hours will be cut off last years figures the journey taking 73 hours as against 83 hours and fifteen minutes last year. The "Soo-Pacific" will leave Chicago on June 28 until August 30, and from July 2 until August 30 in the opposite direction. Both the latter two trains consist of all sleeping cars.

SPILLERS "BAKE-RITE" FLOUR

HAS SOLVED A PROBLEM FOR
HOUSEWIVES IN WESTERN CANADA

All over the West Housewives know their Families enjoy Home-made Bread, but fear their their Baking won't turn out well. Prove your skill with "BAKERITE." Your family will approve.

CHAPTER XXIV.—Continued.

"I cannot see anything very clearly," said Jack, miserably. "I only know my wife has gone. Circumstantial evidence seems to be against her, but nevertheless I will do my utmost to find her. I will take her word against the world."

The magistrate laughed softly, but there was no mirth in the sound. "Have a drink, my dear young friend," he said, "and forget her."

"No, thank you," said Jack. "I do not drink, and I am pretty sure I will never forget her."

There was something in the young man's voice and in his face that made Col. Blackwood wonder if he had pursued the right course. Perhaps he should tell of her coming to him to find out about the marriage. Perhaps he should tell . . . No! the hell-cat! she had been impertinent to him, and she had threatened him.

When Jack had gone the magistrate sat a long time, wondering. Then he went to the cupboard and poured himself a drink; another drink. Ah! that was better. Now he knew he was right; another drink, and he was sure that he had done not only a wise but a noble thing in leaving the marriage unrecorded. After the third drink, he sat in a mellow haze, musing pleasantly on the time that young Jack Doran would come to him with tears standing in his eyes and thank him for what he had done. "You saved me, and though I should live a thousand years I shall never be able to thank you adequately, Sir." And he would reply: "Have done, my boy,—have done; one brave man must ever help another!"

So the night wore pleasantly on.

CHAPTER XXV.

Not so pleasantly did the night pass with Jack Doran, who sat in the station waiting for No. 8 and listening to the wires telling their never-ending story—a dull, gray station, dusty even when the snow had covered all the dust. A red stove in the middle of the floor, egg-shaped, fluted, and either fireless or red hot according to the mood of the agent; torn posters showing palatial white steamers ploughing green seas and carrying pleasure-seeking Canadians to tropical lands, all for trifling sums "and return;" a bill of sale, where in-

ATTENTION, WOMEN OF MIDDLE AGE!

Mrs. Goodkey Tells Her Experience with Pinkham's Compound

Byemore, Alberta. "The Change of Life was the trouble with me and I was run-down, thin, and weak and could not sleep, had a poor appetite and could not do much work. I am taking Lydia E. Pinkham's Vegetable Compound now and I feel like a well woman. I saw it advertised in the papers and tried it and Lydia E. Pinkham's Sanative Wash. I have recommended it to a lot of women friends." Mrs. Wm. Goodkey, Byemore, Alberta.

W. N. U. 1736

structions had been given to the auctioneer to spare nothing, ill-health the cause of the owner's desire to sell; a stray notice re a bull pup answering to the name of "Buster," with a reward; a dance and raffle at Banner-man by St. Faith's Ladies' Aid, program and refreshments, and cordial invitation to all; "Save the Forest" poster—"The forest is ours, let us keep it always;" John Fernwald's announcement of his ability to mend shoes, Old Country methods and moderate prices—try me once.

Jack came back to his own bitter thoughts, to which the telegraph wires made a weird accompaniment, ghostly and grim. He could see the instrument from where he sat, muttering, tapping, clicking with its mysterious finger, silent for a few moments, then convulsed and shaken with the desire to be understood. He thought of all the suppressed emotions, the heart-break, anxiety and fears the wires carried in dead silence along the miles, and how they break into strange tappings here, chokingly alive and articulate.

Life was like that, he mused, we all carry our load of emotions carefully hidden, but we cannot all throw it off at intervals in dots and dashes like the wires.

Reaching the city, Jack went to the Macdonald Hotel, where he met his partner, Keith, whom he had not seen since the night of the recruiting meeting at Peace River. They discussed their plans for the future.

"I am going to have our specimens assayed here at the University, and I will go at once to Victoria to file our claims," said Keith.

Jack told him briefly of his domestic trouble. "I believe she is here in the city," he said in conclusion, "and I want to find her. I will not believe a word unless I hear it from her."

Keith whistled softly. "This is bad work, boy," he said, "and I sure am sorry. Women are the finest in the world or the worst—if they're not one they are the other. When you begin to break off the coupons from your gold mines stock you'll have a flock of them pursuing you, anyway."

Jack was looking out at the wide view of the winter landscape, with the magnificent river, covered with snow, winding away into the blue distance. "I don't want a flock," he said, "but I do want Helmi. If you knew her, Keith, you would know she couldn't be crooked. She has eyes that are like a little girl's, full of wonder and innocence."

"I don't believe there are any innocent girls these days," Keith replied, lighting his pipe for the twentieth time. He could never keep his pipe going, and when he sat for half an hour in one place he had burnt matches strewn around him like confetti around a bride. Keith was a low-set man of very dark complexion, tanned now to a rich mahogany.

"My own opinion is that you are well out of it, Jack," he continued; "but I'll admit I'm no judge of women. They can all fool me."

"Sometimes I think of enlisting," said Jack. "When I listened to that boy leaning on his crutch I wanted to go. The other old soak rather spoiled it, though."

"Gosh! I liked him," said Keith, grinning. "He told us some of the richest stories I ever heard."

"I couldn't stand him and his stories," Jack said with warmth, "he's the sort that make war, he loves it, you can see that—but you'll notice he will never do any of the fighting. It looks as if the thing had to be finished up now that we are in it."

Keith was watching Jack closely, even though he was so busy keeping his pipe going. "I'll certainly look after your interests, Jack, if you want to go. I'll file for you on everything I get while you're gone, and I'm going to get right after the potassium deposits and the oil as soon as I get the gold cinched."

"I knew you would," said Jack gratefully. "I am not thinking about that."

"And I'll do my best to locate the Helmi girl and see that she has plenty."

Jack remembered Helmi's outbreak of rage when Keith's name was mentioned, and hastened to say, "I hope I'll find her before I go."

So, gradually, the thought of enlisting took shape in Jack's mind. It was with him when he stepped into the white bath-tub and enjoyed the luxury it afforded, with its shining appointments, snowy towels, foaming soap. But he couldn't forget what Private Crowe had told about the

Many of Canada's leading social and sporting clubs use Red Rose Orange Pekoe Tea exclusively. The added strength and inimitable flavor of Red Rose Orange Pekoe make it last longer, go farther and taste better. Packed in damp-proof aluminum.

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

DENTAL HEALTH PILLARS

"Sugar and spice and everything nice" may be what little girls are made of, but certainly such a diet would never build strong, healthy little girls and boys.

With the child properly started on the road to health, through the mother's careful dietary habits, there must be no slacking in this regard, if it is to continue safely along the way.

Proper diet from the nursing period up through adolescence has much to do with teeth and health. It is now that nutrition plays the chief role in the formation of healthy tooth tissues or in their early degeneration and decay. But hand in hand with this must go the maintenance of cleanliness through training the child in the best and most thorough mouth hygiene.

The notion that the deciduous teeth being replaced by successors can therefore be allowed to go without the care necessary to keep them sound and comfortable is most mischievous. Too early loss of these little teeth from any cause, leads to disturbances of the permanent dentition with consequent general disorders.

It would be better for the young child not to know the taste of sweets too soon, thereby avoiding their craving at this early age when they may be harmful both to the tooth and the body health. Plain wholesome foods should be the rule including plenty of milk which, because it is both rich in nutrient qualities and easily assimilated, is the perfect food for the young child.

Parents should be reminded too, that the child should be brought to the dentist at about three years of age and thereafter at stated intervals. Preferably the first visit should be made before there are any cavities in order to establish the confidence of the young child in these services. Much of the dread of dental treatment, with its consequent neglect of mouth conditions among adults has arisen through recollections of a painful first visit during the tender years.

It may be further noted that the susceptibility to tooth decay is greatest in youth, most cavities appearing before the twenty-fifth year; and that the period of adolescence and between the twelfth and sixteenth years, marks the high-water mark of dental decay;—due to the rapid physical changes demanding an increased calcium supply present in the diet. Diet, mouth hygiene and systematic dental examinations are the three pillars of dental health.

Ocean Ships For the Great Lakes

Tramp Steamers From Europe Pushing Their Way Into the Great Lakes

One indication that if the St. Lawrence canals were deepened, sea-going freighters would come up to the ports on the great lakes is that this is already done by tramp steamers which are able to go through the shallow St. Lawrence canals. A German freighter from Hamburg is now lying at the docks of Detroit taking on a cargo of motor-cars which it will unload at Barcelona, Spain. For years past an occasional small tramp steamer has pushed its way into the great lakes in search of a grain cargo. If these things happen with 11-foot canals it is a safe prediction that a 27-foot channel would bring whole fleets of tramps to the lake ports. The tramp steamer will go where there is traffic if it is possible to get there. Manitoba Free Press.

Attacked By Asthma. The first fearful sensation of suffocation, which hour by hour becomes more desperate and hopeless. To such a case the relief afforded by Dr. J. D. Kellogg's Asthma Remedy seems nothing less than miraculous. Its help is quickly apparent and soon the dreadful attack is mastered. The asthmatic who has found out the dependability of this sterling remedy will never be without it. It is sold everywhere.

Over Fifty Minerals Being Produced

A notable feature of the program of the Dominion as a mining country is the diversity of lines along which Canadian mining has advanced. Some fifty different minerals, metallic and non-metallic, are listed in the production figures for 1924, and this number includes a variety such as nickel, cobalt, asbestos, gold, lead, silver, copper, and zinc, in which Canada either leads world production or ranks among the greater producing nations.

Most of the bats of Canada eat only insects, but there are a few fruit-eating bats in the extreme south of the United States and many in Mexico and Central America.

WRIGLEYS

Add to the joy of the open road—this pleasure-giving refreshment. A sugar-coated gum that affords double value. Peppermint flavor in the sugar coating and peppermint flavored gum inside.

Between Smokes

Little Helps For This Week

"The will of the Lord be done."—Acts XXI. 14.

Light! more light to see What is the true and perfect will of God. That we may help to do it; not as tools, That know not what they fashion, but as hands, Whose heart is in their work; and whatsoever It be, this, above all, more faith to cry In darkness or in light, "Thy will be done."

Love is higher than duty, and the reason is that love in reality contains duty in itself. Love is duty and something more. "Love is a beautiful plant with a beautiful flower, of which duty is the stalk." All acceptable obedience flows from love; all true love produces cheerful service. We do not really love God if we do not seek to obey Him. —Rose Porter

Always Ready and Reliable.—Practically all pains arising from inflammation can be removed with Dr. Thomas' Electric Oil. Simply rub it on the sore spot and it is quickly absorbed by the skin. Its healing power is conveyed to the inflamed tissue which is quickly soothed. This fine old remedy is also a specific for all manner of cuts, scratches, bruises and sprains. Keep a bottle handy always.

Cardinal Newman On Style

To Produce Good Literature Put Your Thoughts Into the Simplest and Clearest Words Possible

"I have no style," wrote Cardinal Newman. "All my life I have tried to think out clearly what I know, what I see, what I feel, and to put it into the simplest and clearest words. That is all my style. To produce literature you must first of all know what you are writing about; write in as simple words as you can; cut out the purple patches; be sincere without being dull; grip the subject before you; feel it, and translate it into the simple English our fathers have handed down to us."

For Rheumatism use Minard's Liniment.

No Chrome Being Produced

There has been no production of chrome in the Dominion in recent years although Canada is known to possess reserves of chrome ore, and a considerable tonnage was mined and shipped during the war period.

A Swedish count is coming to Canada to learn farming by working as an agricultural laborer, and the question is, what farmer is going to take the count?

NEGLECTED ANAEMIA

Often Leads To the Most Serious Consequences

In no disorder is delay or neglect more dangerous than in anaemia. Usually the first noticeable signs are pale lips and cheeks, dark rims under the eyes and a feeling of weariness. Then follow headaches, backaches, palpitation and breathlessness. The only way that anaemia can be overcome is to enrich the blood, and it is because of their wonderful blood-enriching and blood-making properties that Dr. Williams' Pink Pills have won such great success in the treatment of this often most stubborn disease.

Thousands of young girls who were in an anaemic condition owe their present good health to Dr. Williams' Pink Pills. One of these, Miss Katie McEachern, Port Hood, N.S., says:—"I praise the day I began the use of Dr. Williams' Pink Pills. I had not been feeling well for some time. I was very pale, had severe headaches, dizzy spells, and occasional fainting spells. The least exertion would leave me tired and breathless. In this condition I began taking Dr. Williams' Pink Pills. I continued their use until I had taken six boxes, by which time I was again enjoying good health. I hope my experience will lead other sufferers to give this medicine a fair trial."

If you are at all run-down, or weak, you should begin at once to take Dr. Williams' Pink Pills and you will soon be well and strong. These pills are sold by all medicine dealers or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Plains Buffalo In North

The experiment of transferring buffalo from the national park at Wainwright, Alberta, to Wood Buffalo Park near Fort Smith, Northwest Territories, has proved entirely successful and the 5,500 plains buffalo which have already been transported have definitely shown their adaptability to northern conditions.

British scientist says that the brain is the only part of the body which doesn't wear out. The test of this theory, is, of course, first to find the brain.

Walk in Peace

Remove the hard skin from your corns, apply Minard's freely and get comforting relief.

CALGARY BREWING AND MALTING CO. LTD.**Who Does Your Printing?**

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.

WHEN IN NEED OF PRINTED MATTER CONSULT
